To Whom It May Concern;

I am writing with concern about the disposal of nuclear waste at Yucca Mountain, Nevada. I do not feel that nuclear power is in our best interest anyway & this is the reason why - we have to dispose of the waste & it is a danger to those around it for a very long time. Any culture who cared about their future & descendants would not even consider this as an option. It is not fair to dispose of this waste on innocent people. Please take this into consideration.

Sincerely,

Jean Nosbeck
